The *Autotrophic* and *Saturation* parameters are used to calculate the ANC. The *Autotrophic* parameter is used to calculate the *Autotrophic* ANC, and the *Saturation* parameter is used to calculate the *Saturation* ANC.

ANC Advice: ANC visits are essential for monitoring your health and the baby's growth. During these visits, the healthcare provider will check your blood pressure, heart rate, and weight. They will also perform a physical exam and may do some tests like a urine test and a blood test (Hb, ANC, etc.).

Nutrition Tip: Eat a balanced diet with plenty of fruits, vegetables, and whole grains. Avoid junk food and sugary drinks. Stay hydrated by drinking plenty of water.

Recommendations

- 1. Monitor your blood pressure regularly. SpO2 should be above 95%.
- 2. Take prenatal vitamins as prescribed.
- 3. Follow WHO guidelines for a healthy pregnancy. Complete all recommended tests.
- 4. Avoid smoking, alcohol, and drugs.
- 5. Watch for signs of complications like contractions, bleeding, or decreased fetal movement.
